## SECTION 8 - OTHER EVENTS

### Item 8.01 Other Events

Minnesota Power's large power taconite customers, subject to demand nomination requirements, nominate demand levels for their energy needs each December, March, and August for the following four-month periods. As expected, and based on nominations received on February 29, 2016, Minnesota Power's Large Power taconite customers nominated at approximately 80 percent of full demand levels for May through August of 2016, which is consistent with December 1, 2015, demand nominations.

Minnesota Power proactively sells power that is temporarily not required by industrial customers in the wholesale power markets to optimize the value of its generating facilities. Minnesota Power has remarketed the power not expected to be taken by the idled taconite facilities and is well positioned to serve power needs for those facilities in the event they resume production sooner than currently indicated. In addition, the company expects to reduce operating expenses to help mitigate the impact on earnings from the reduced power loads for this time period. Minnesota Power is committed to earning a fair rate of return that rewards investors, allows for reinvestment and sustains growth.
